

## We do not have public parking at the cathedral.

- The yellow loading zone is used for weddings, you may have a limousine, hummer, bus, carriage, etc. parked there during the ceremony but if they are asked by an Officer to move, they will need to move the vehicle. The vehicle must not be left unattended at any time.
- Disabled parking is not available on the premises; however, there are minimal disabled parking spaces on Market Street. The disabled person may be dropped off in the front of the church. There is wheelchair access to the Cathedral on the left side of the Church. Please advise your wedding coordinator if special accommodations are needed for any disabled persons.
- We do not provide parking for the outside priest, yourselves, the wedding party, or your guests. As a courtesy we have provided a map of parking facilities nearby. Contact these facilities directly for a change in rates or space prior to your wedding.
- Please be aware that street parking with meters do run on Saturday and will be cited if time expires. Please visit our website link to city parking information: [www.stjosephcathedral.org](http://www.stjosephcathedral.org)
